

ACFD TRUCK COMPANY PERFORMANCE EVOLUTION #1

Peak Roof Vent with 24' Straight Ladder

Tactical Objective: Set up for Peaked Roof Ventilation

Given: 3-person crew in full turnout equipment, Truck with 24' single ladder, 3 SCBAs, axe, 8' pike pole / vent hook, chain saw. Aerial ladder positioned facing away with rear of tiller approximately 50' from laddering location.

Performance: The crew will position the 24' Climbing Ladder for access onto a LOW PITCH, PEAKED ROOF, bring all tools aloft in full PPE including gloves, and start saw

Standard: Within 2:45 minutes, in a SAFE and EFFICIENT manner. The TIME STARTS with all crew members sitting in the Truck and the command, "SET UP for ROOF VENTILATION" is given by the Officer. The TIME STOPS when all members are on the roof with saw running in full PPE including mask and gloves.
